

RoeTest-V9 by Mario Punsola

Barcelona

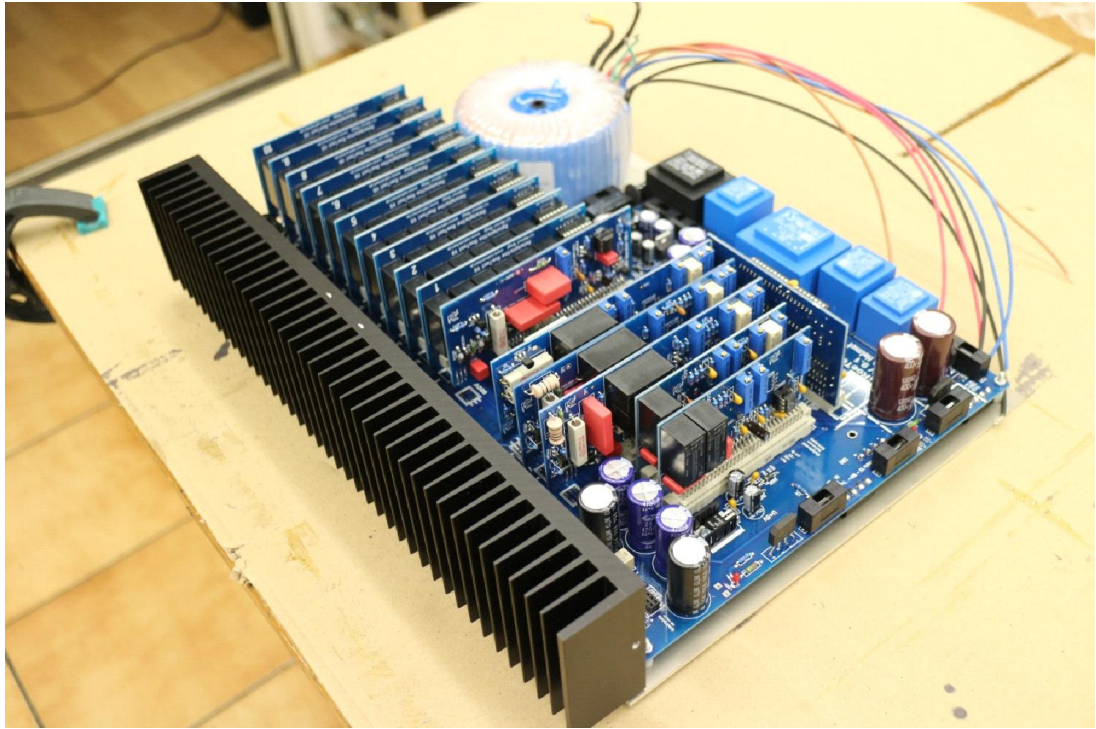

I would like to thank Helmut for the good job he has made designing this tube tester. And I would like also to highlight the personalized attention that he has dedicated me before any doubt or problem. He has all my admiration.

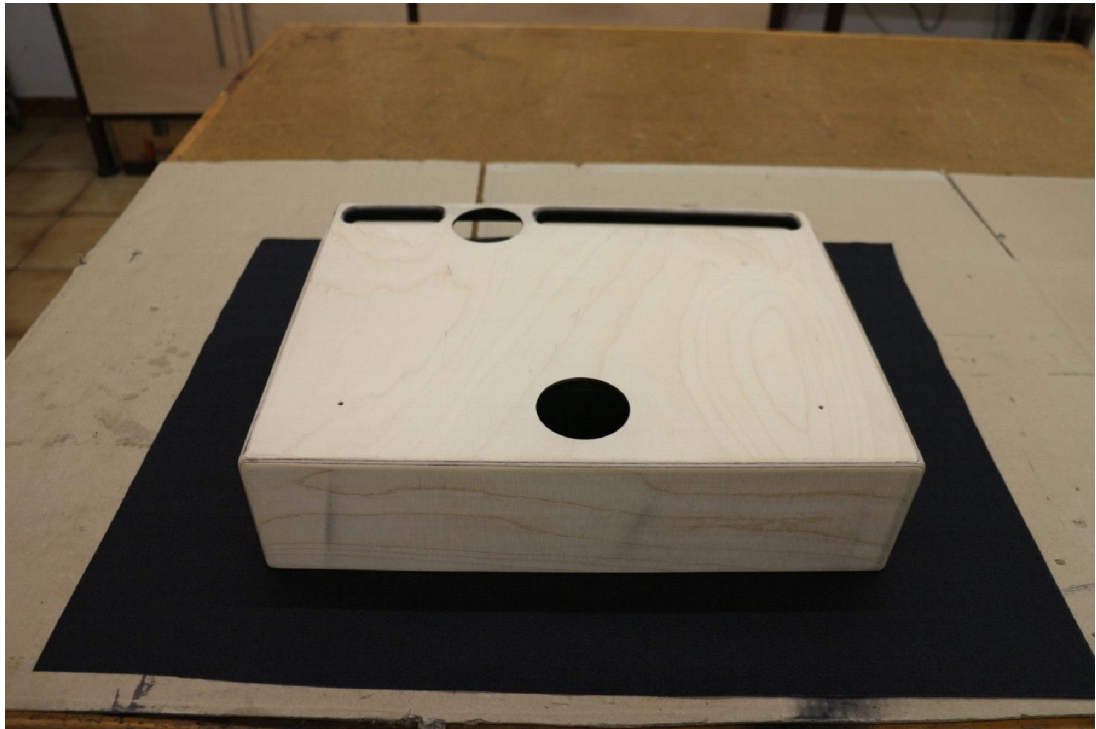

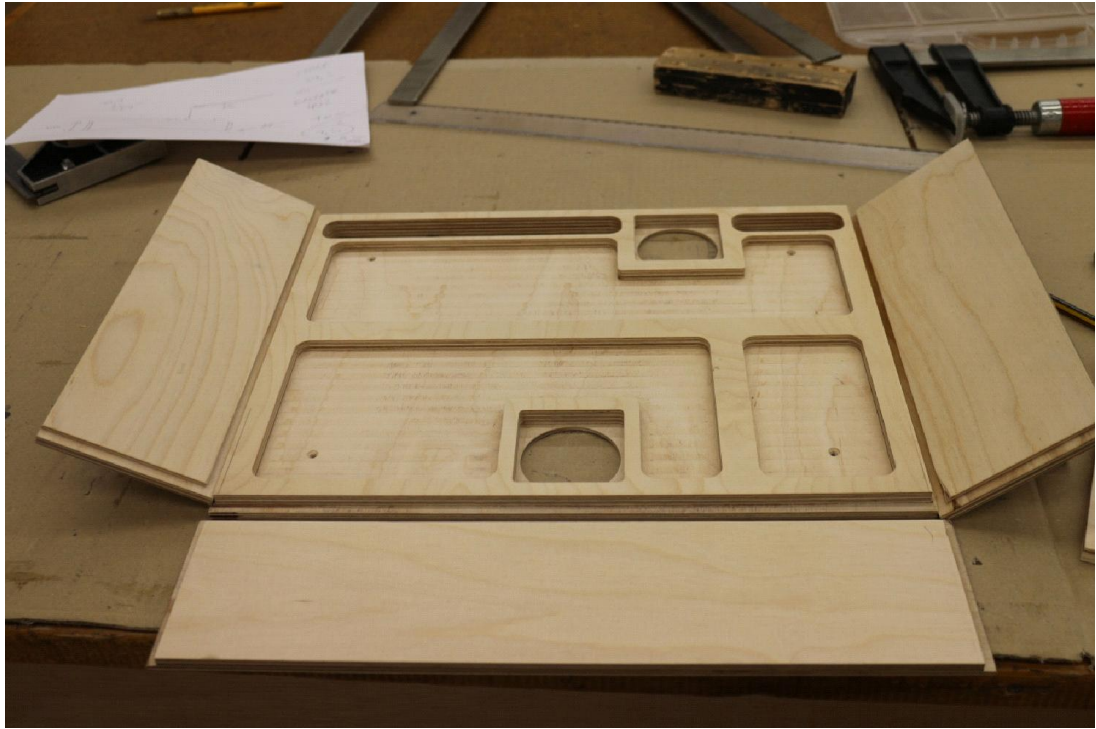

I attached some photos of the construction:

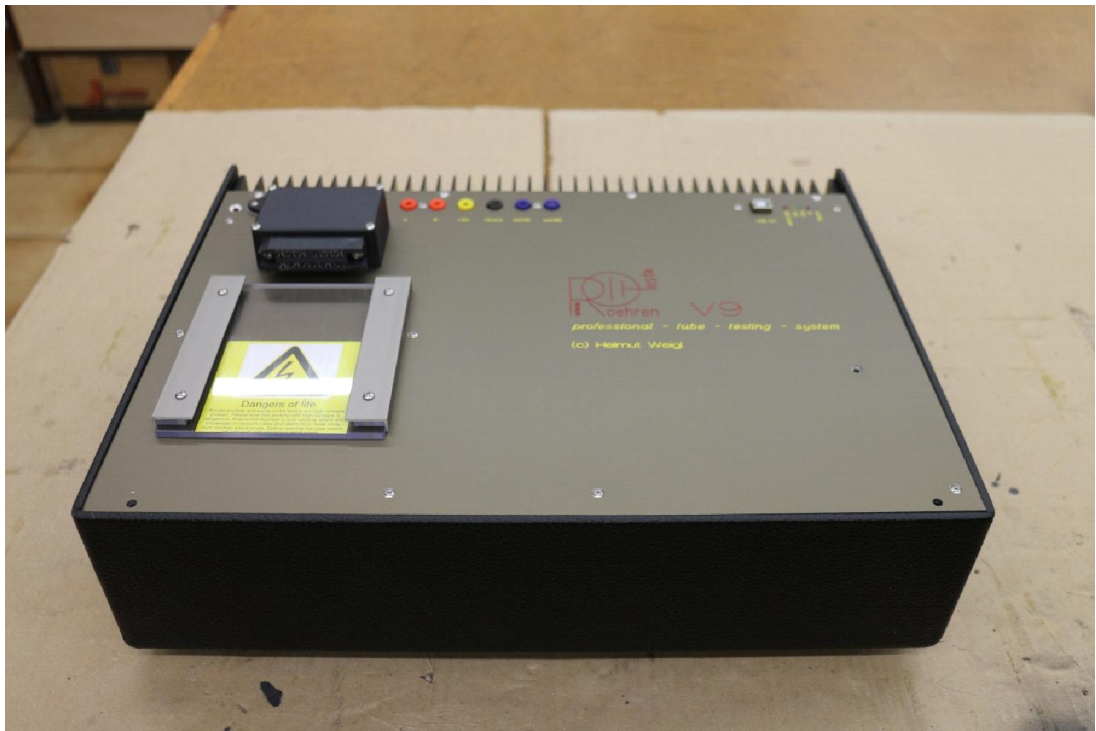

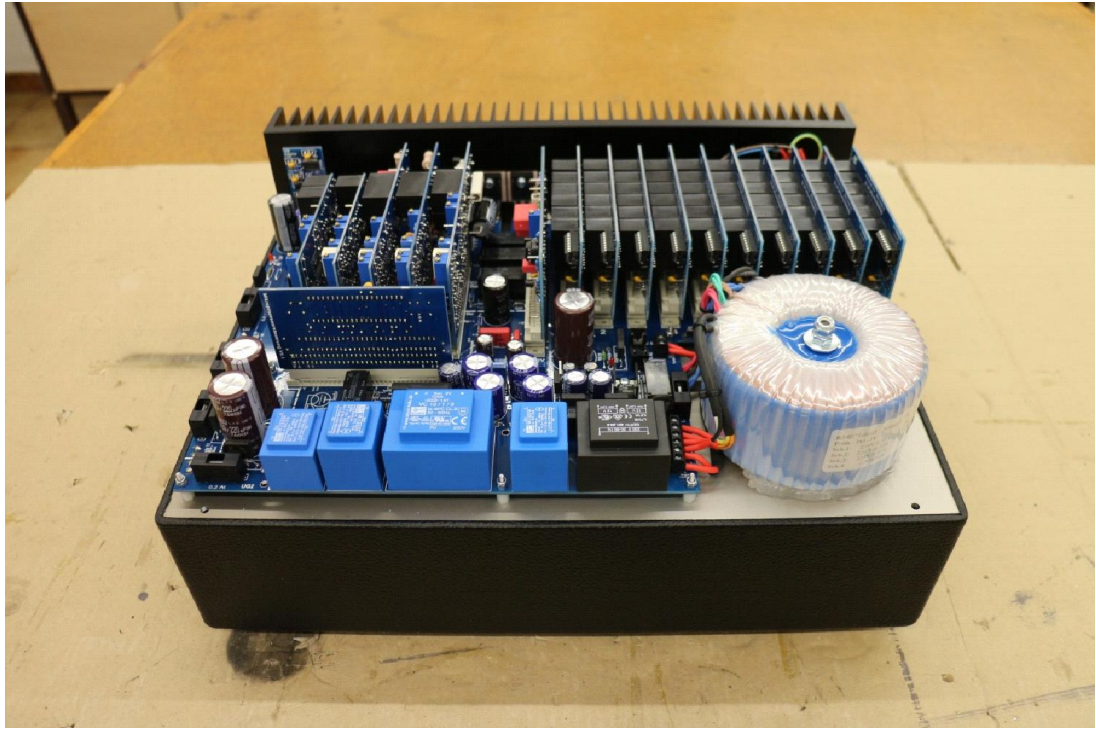

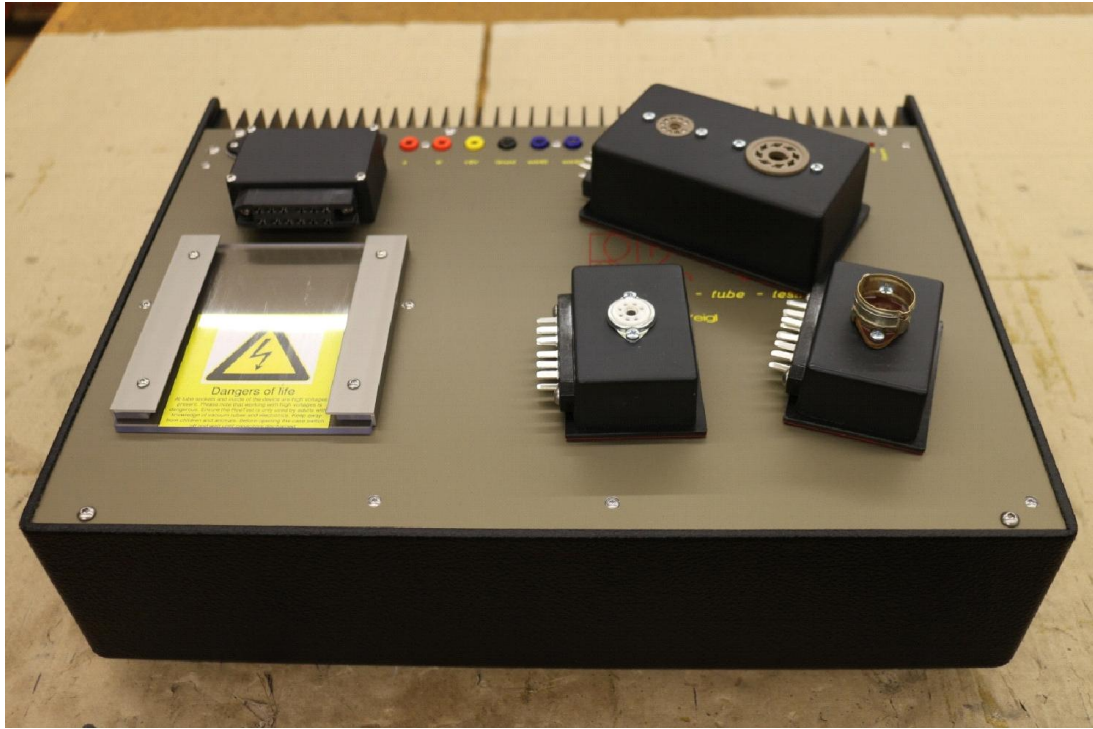

RoeTest finished and working. It is a very useful tool for my workshop why it

is well worth money and time spent.

Thank you very much Helmut, it has been a pleasure to build it.
